

Construction of 16,000 sq. ft. **valet rack storage building** was completed in the fall of 2007. This new facility offers boating enthusiasts easy access to the water and the peace of mind that can only be achieved by a fully enclosed, weather-tight structure. We can accommodate 72 boats up to 30+ feet in length year round.

During the summer season your boat will be launched and waiting for you on demand. Upon returning, your boat will be hauled rinsed with fresh water and returned to the safety of the rack building. Should you need to work on your boat we have plenty of ground service stands for

your use, each of which has power and water nearby.

In addition, we can provide inside winter storage for larger boats on a limited basis. Center aisle must launch by April 30.

Winter Indoor rates for large boats stored in the center aisle include:

- dust cover
- wash and wax hull
- light sand and paint bottom
- change hull and running gear zincs (labor only - parts extra)
