

New **outdoor valet racks** that can accommodate as many as 50 vessels up to 35' were installed during the summer of 2008 right across from the [Valet Rack Building](#)

Our outdoor racks offer boaters a convenience of a valet service at a great price!

During the summer season your boat is launched on demand and upon your return the boat is rinsed with fresh water and put back on the rack. Should you need to work on your boat, we have a number of ground stands that may be used. Each stand has water and power nearby.
