_____ 4-Cylinder	\$250.00	_____ 8-Cylinder	\$300.00
_____ 6-Cylinder	\$275.00	_____ Big Block	\$325.00

* EFI/MPI motors extra

Cooling Systems-on most inboards consist of three main components, a seawater pump, a thermostat, which regulates temperature and a circulating pump which pumps water through the engine. The two components that have the most common failures are the rubber impeller in the seawater pump and the thermostat. Most manufactures recommend that these parts be changed every two years.

_____ Change Water Pumps & Thermostats T&M

Winterize Diesel Motors-Service Package includes: flush and drain seawater cooling system with non-toxic antifreeze, check transmission fluid, grease fittings, change engine zincs, spray with rust inhibitor, stabilize fuel and restart in the spring. *(Labor Only Parts are Extra)*

_____ Winterize Diesel Motor T&M

Engine Manifolds-on most inboard motors have a very tough job. They pass saltwater as a coolant through one set of passages and corrosive exhaust gases through another. Over time these passages clog or breakdown causing saltwater to flood into your motor which can cause major damage. Typical life expectancy of a manifold is from 3 to 5 years depending on use and they should be replaced before major damage can occur.

_____ Call for an Estimate

Winterize Water Systems - Package Service Includes: Flush & drain fresh and saltwater systems with non-toxic antifreeze. Does not include AC systems which are listed separately. *(Labor Only Parts are Extra)*
